THE MUTUAL CLUB. One of the finest displays of ball-playing ever witnessed, and one of the most exeding and closely contested games of the season, was that which took place sterday on the Union Grounds, Brooklyn, on the occaon of the return game of the hone-and-home serieshad over from last season-between the Mutuai Club of ded by many that, after the defeat of the Mutuals by the Atlantics, the former would have been reused up to extra exertion to recover their vantage ground by defeat, this was the case in a measure, for the Mutan's never played more finely in the field than on this occasion; but ey found Paber a more wily opponent in the pitcher's school than Zettlein, and the result was far less effect

The game began at \$10 p. m. with the Mutuals at the bat, and though some very profit hits were made by the bat, and though some very profit hits were made by the bat, and though some very profit hits were made by the bat, and though the Thioms of Murfin to Goldie, their three first strikers were placed bors do remaint, a biank score first strikers were placed bors do remaint, a bank score first strikers were placed bors do not mat, a significant confidence. Hattield and Martin, the tally was left at 2 to 2, the game, the play on both sides promising a line disping and a close contest.

In the next three imings the Matuals were unable to store a slingle additional run, so admirably was the Union field attended to in every position, the strikers retring in succession cach inning. Birdsail capturing four presences by sphendid catches; Goldie and Martin two at first base, and Kefcham, Martin, and Pabor one each on finely easier fly balls. By the good hits made by Martin, Anchin, Goddie, Ketcham, and Smith in these innings, the Unions anded four runs to their score. McMahon taking two fly indis in style, and Bearman, Hatfield, Pike, and Devyr one each, while Pike, Devyr, and Bearman disposed of two at first base, the fifth innings closing with the tally at the small figures of 6 to 2 in favor of the Unions, the game thus far having occupied but an hour. It was now evident that the Unions could but Peters's peting cetter than the Matuals could that of Pabor, and it would have been good judgment to have tried Martin, But the Matual capitals kept on the speed, and though the Matual capitals kept on the speed, and though the match having occupied but in hour. The Newark players went first to the bat and led off with seven runs, of which they deserved but one. The inning was closed by three men having struck out, McGraw, the first striker, performing this feat twice. The conhumites were treated to a cipher, and at the end of the third in-ning were in a manority of 11 runs. THE ATHLETIC AND ATLANTIC CLUBS.

On the 11th of July last the Secretary of the Athletic Club addressed Mr. Smith, Corresponding Secretary of the Atlantic, stating that he was instructed by the Atlantic Match Committee that it was the desire of the Club to forget past differences, and to again meet in generous rivalry either to decide the home-and-home generous rivalry either to decide the home-and-home game or commence a new series. The letter was by mistake addressed to Box No. 214 New-York Post-Office, instead of No. 214 Brooklyn Post-Office. After waiting some three weeks, and not receiving any reply, Mr. Bell addressed a note to J. A. Regan, Corresponding Secretary, asking whether his letter of the 11th had been received, and if so, why had no answer been returned. In answer to this note he received a communication stating that his former letter had just been received and would be had before the cinb at its next meeting. Here the matter rests. We hope soon to hear that the Atlantics have accepted the proposition of the Athletics.

ATLANTIC AGT, PICKED NINE.

ATLANTIC AGT, PICKED NINE, The match between the Atlantics and a picked nine on Saturday should be a fine game. The picked nine will be Dockney, Walker, swandell, Hatfield, Pike, Devyr, Rogers, Maediarnid, and Patterson—a strong team of players, and one which ought to trouble the champions.

Dames now sunfering from Pruskin persecution in Schleswig. There was a large attendance. Gen. Christianson,
who served in the Federal array during the late war, occupied the chair, and introduced the lecturer in some
being and appropriate remarks. The lecturer referred to
the early colonization and discovery of portions of the
American Continent by the Scandinavian race, and stated,
that they were always the foremost in Europe to oppose
tyranny and oppression. The great bulk of the race in
this country was settled in the Far West—in lowa, Wisconsin, Minnesota, and other States, where, by their frugality and industry, they had accumulated considerable
property. The lecturer said he believed that the wellknown benevolence of the Scandinavians would be manifested by contributions to the relief of their distressed
brothers in Europe. It was stated that 18,000 circulars
had been distributed by the Central Committee, and that
a generous response was expected.

Coroner Wildey vesterday, at No. 237 Bowery.

Coroner Wildey yesterday, at No. 237 Bowery, held an inquest over the body of Edward Jones, who was shot on Monday afternoon in the shooting gallery of Barnum's Museum. From the statements of John Conshot on Monaly afternoon in the statements of John Conners, a boy employed in the gallery, and who was present at the time, it appears that about noon of the above day, two boys, aged about 10 years each, came into the gallery and wanted to shoot. Deceased loaded a rifle and placed it in the tunnel, and then went down to the end of the gallery to paint the target. While thus engaged one of the boys picked up the rifle, and was examining it, when it was discharged, the ball entering the back of deceased about four inches from the spine. He died in about ten minutes. Dr. Wooster Beach found that the ball had penetrated the liver and heart. The name of the boy has not yet been ascertained. Deceased was a pative of this city, aged 23 years, and resided with his brothef-lin-law, at No. 315 West Twenty-ninth-st. He served during the war in the 186th New-York Vols., participated in 18 battles, was taken prisoner, and remained for six months in the Rebel prison at Salisbury, N. C. He was a careful, steady man, possessing the confidence of his employers.

Application was yesterday made in the Supreme Court of Kings County for an injunction restraining the Board of Superintendents of the Poor from fulfilling a contract made by them with Messrs. Cooper & Disbrow for a supply of meat for the County institutions. Mr. Frederick Scholes, a Supervisor, made affidavit setting forth that the contract referred to was invalid by reason of not being sanctioned, as required by law, by the proper committee of the Board of Supervisors. The injunction was granted. This body of public officials, to whom is intrusted an immense responsibility, and the almost uncontrolled disbursement of some \$30,000 per aunum, appears to be laboring under the bar of suspicion. Their accounts were placed in the hads of an investigating committee, from whom a report is shortly expected. This contract difficulty is of ions standing, having occurred annually for the past decay, but the present is the first instance of the action of the Board being restrained by the action of the courts.

With the good people, soft breezes came; and sun and cloud alternately rested on the camp. The scene had much of beauty, the white tents and the varied colors of dress of thousands of people so strongly contrasting with the dull brown and gray of the tree-tranks and the green of the foliage. There was of course the usual show of individual enterprise—the usual buying and selling of refreshments are extra heavy and strong.

A CARD.-In 1861 ........ discontinued the discount fermerly given to the Jobbing Trade, and, ignoring the services of middle men, has sold his pens either directly to those who use them, or to such as keep them on hand for the better supply of the writing public in their own localities. There may be Jobbers who have spoken in favor of the Morton Pen since that time, but, if so, their remarks have never in a single instance reached his ear; and although they generally admit that Morton can make the best pens in the world, and used to do so, they nevertheless put forth great exertions to show that the Morton Pen has depreciated in value, is not what it formerly was, and that those which they vend are equal, if not superior; now since many Retail Dealers obtain what little they know of pens, as well as the pens themselves, entirely from the Jobbers, people are apt to be misled by their representations.

In order that the public may judge correctly, and at the same time see how much painstaking is exercised to give every one who orders just such a pen as will exactly suit his hand, Morton confidently refers to the many thousands, throughout the entire country, who have received his pens through the mails during that time, and also calls particular attention to the following letter which has accompanied every

you wish to change the size or quality, in which instance additional stamps must be sent. A. MORTON. Respectly, yours,

Also the following: TO ALL WHO USE A PEN.

TO ALL WHO USE A PEN.

A GOOD GOLD PEN is always ready and reliable, and, if adapted to the hand, makes writing a pleasure rather than a task.

The beginner makes more rapid progress with a Gold Pen than with any other, because the same pressure always produces the same result; and the proficient is better satisfied with his labor, because of the greater uniformity of his writing, and the case by which it is produced. formity of his writing, and the ease by which it is produced.

In making new pens, the subscriber uses no solder. The gold at the point is brought to a state of fusion, when the point sinks into it, and the two become as one netal, entirely impervious to the action of the acids in inks. This can be done in making new pens, because the gold is more than three times as thick as it is after the pen is rolled to the proper thinness of the finished state. When pens are repointed a solder must be used which will melt sooner than the gold of which the pen is made, other wise the points will curl into a globular form. By this process the temper is taken out of the nib, the elasticity is destroyed, and the pen subjected to the sure process of corrosion. On these accounts, and knowing from long experience that repointed pens can rarely give satisfaction, the subscriber must positively Refuse to Repoint Gold Pens.

satisfaction, the subscriber must positively Refuse to Repoint Gold Pens.
Return the pen within ten days after its reception, if stauped "A.
